Description:

From Library Journal The author of numerous books with a New Age bent, including the best-selling *The Outsider*, Wilson here presents an unusual thesis: an ancient civilization, popularly called Atlantis, transmitted its advanced culture to other ancient civilizations before disappearing in a

worldwide catastrophe. He examines antique maps, documents, archaeological records, and historical writings to "prove" that humankind is older than frequently supposed and that Atlanteans were the precursors of Egyptians, Aztecs, and Maya. Wilson also posits the existence of a collective human consciousness that permitted ancient peoples to work smoothly with other members of their groups. His most interesting (and believable) statement is that the Sphinx shows signs of water damage, an indication that it is much older than "experts" say. This volume, which bears comparison to John West's *Serpent in the Sky* (1979), presents its theories in a sober and readable manner. Suitable for public libraries. Norman Malwitz, Queens Borough P.L., Jamaica, N.Y.
