Description:

Principles of Pediatric Nursing: Caring for Children is intended for use in pediatric nursing courses in associate and baccalaureate degree programs. It may also be helpful for practicing nurses working on hospital units and in health centers.

¿

Written to prepare today's student for excellence in nursing, ***Principles of Pediatric Nursing*** presents a foundation of core pediatric nursing principles with an emphasis on growth and development, family-centered care, and health promotion and maintenance. The book integrates research, clinical reasoning, and evidence-based practice to help readers make connections between classroom and clinical situations. This edition empowers students to move beyond rote memorization of facts. Clinical reasoning and problem-solving principles help readers develop their clinical judgment so that they can learn to apply information as nursing practice continues to develop.

¿

Principles of Pediatric Nursing is available packaged with **MyNursingLab®**, an online homework, tutorial, and assessment program that engages students in learning. It helps students review, remember, and then apply key concepts—resulting in better performance in the course—and provides educators with a dynamic set of tools for gauging individual and class progress.
